

WEEKLY UPDATE

May 29, 2020

Dear Residents and Families/Representatives,

Please accept this letter as our facility's weekly update to keep you informed about the status of COVID in our facility and what we are doing to keep our residents and staff safe during the ongoing coronavirus pandemic.

As of today, 35 residents and 25 staff members have tested positive for COVID-19 in our facility. Currently, 9 residents are resolved and 14 employees have returned to work. In May, we had all of our staff and residents tested to in an effort to gain more knowledge so we can prevent further spread of the virus. To make sure all the residents have daily activities during isolation, we are doing one on one activities based on the interests of each resident, along with room bingo and hallway karaoke, where both the staff and residents can find joy and entertainment. Additionally, we are doing activities involving essential oils and hand massages, as well as personal grooming such as hair cuts and hot shaves, to make sure that our residents maintain the sense of dignity they've come to expect.

We remain committed to protecting our residents and staff and preventing further spread of this virus. As we previously reported, we will continue to implement and practice enhanced safety precautions recommended by our federal, state and local health officials, such as, only allowing essential personnel inside the facility, performing regular screenings for signs and symptoms of illness prior to entering the building, continually monitoring residents, performing regular deep cleanings, using PPE as recommended by the CDC, providing individual activities as opposed to group activities, implementing isolation protocols as required, and reminding and encouraging staff to practice social distancing and to use hand sanitizer and frequently wash their hands when they are in the facility and out in the community.

As a reminder, we will continue to post updates on our facility website and we will individually notify representatives/families regarding a resident's condition if he/she tests positive for COVID-19 or is displaying symptoms of COVID-19. If you have any questions or concerns please contact us directly 702-644-1888.

Sincerely,

Julie Liebo
